

Qingdao Sunshine

Double Wall Corrugated Pipe Machine

Feeder

Qingdao Sunshine

Electric Control Cabinet

Forming Machine

Mould

Features of Double Wall Corrugated Pipe Machine:

1. Pressure water-cooling for mould blocks greatly increase the production speed; the maximum speed is 10.3m/min.
2. Low energy consumption help to cut production cost.
3. Efficient vacuum system for forming perfect pipes.
4. Mould block temperature control system helps to optimize the pipe quality both appearance and inside.
5. Easy and quick changeover between different sizes of moulds.
6. The complete extrusion line runs full-automatically.
7. Corrugator and extruders are synchronously controlled.
8. Harden treated screw and barrels for longer life span and durability.
9. Remote Service is available.
