PVC Ceiling/ Wall Panel Machine

PVC ceiling wall panel machine is used to produce pvc ceiling panel, pvc decoration wall panel and pvc foam board. If change the mould, it can also produce other different pvc profiles.

Extruder Type	Motor Power (kw)	Output (kg/h)
SSS-51/105	22	80-110
SSS-65/132	37	150-200
SSS-80/156	55	300-400

This machine can produce the pvc ceiling panel width is 200 mm, 250mm, 300mm, 600mm, pvc wall panel width is 400 mm and 600 mm. The thickness of pvc ceiling and wall panels can be customized according to customer requirements. If you need to produce other widths, you can use one production line to replace different molds to produce different final products.

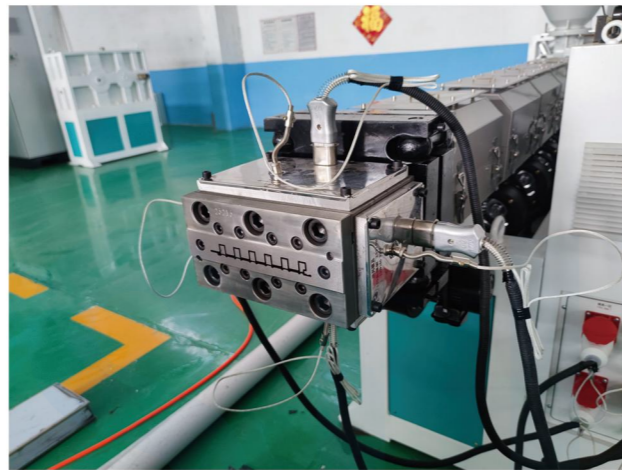

Production Flow

Automatic Loader → Double Screw Extruder → Mould → Vacuum Calibration Table → Haul-off Machine → Online Lamination Machine or Hot Stamping Transfer Machine (optional) → Cutting Machine → Stacker
